SKILLS

- Python
- Pandas
- Numpy
- matplotlib
- Scikit learn
- Tensorflow
- OpenCV
- Java
- SQL
- Drupal CMS
- HTML, CSS, PHP

CERTIFICATES

Data Analytics
Coursera
Sept 2023

Java Development
Raj Classes, Nashik
Dec 2022

Android Development with Kotlin
RYK Science college
March 2023

EDUCATION

MSC-CA   2023-2025
Symbiosis Institute of Computer Studies and Research, Pune
- Data Science as specialization

BSC-CS
RYK Science College, Nashik 2020-2023

PROFILE

Innovative and enthusiastic computer science educator with passion for critical thinking and love for technology and programming, looking to kick start my professional career with a core technical role of my studies in CS that will make me grow my skills to generate company revenue and customer satisfaction .

PROJECTS

Color Detection using Python
- Build a python project which detects the color from the given image by clicking on it.
- Colors Data set was used to for this project as it contain 800+ color types
- Libraries like Pandas and OpenCV was used to develop the code.
- This project give brief idea about Image detecting.

House Price Prediction
- Build a Python project which uses the previous data to predict the the future value of the house
- here we have using the Melbourne Housing Marking dataset to find the prediction.
- During coding making changes in data was required as finding missing value , removing unnecessary columns etc.
- work with libraries like pandas, matplotlib, OpenCV during this project.

Covid-19 Data Visualization
- Understanding the visualization technique using matplotlib.
- Work with covid-19 Time Series dataset to get the exact output
- Uses different types of Visualization tools such as Bar Graph, Box plot, Scatter plot etc.
- This Project gives more idea about how data Visualization works

Online Ticket Booking using Drupal CMS
- Work with Drupal Content management system to build a online ticket site. Has a experience in installing and configuring Drupal.
- Also worked with different types of themes installation and YML files which gives better understanding of Drupal internal data structures.

Project on Resort Managements System
- Worked on HTML, CSS, PHP and JavaScript to create site for resort which has all the features.
- Created multiple pages for site eg: Home page, Login page, Payment gateway etc.
- All the details of clients and admin saves in the database using My SQL database
- Work on documentation and full development and testing

Basic Calculator using Kotlin
- ask user to enter two numbers and an operator. It then performs the corresponding operation and prints the result.
- It includes basic error handling for division by zero and invalid operators.
